# **SERV-RITE** Wire

## **Thermocouple and Extension Wire**

## High-Temperature Braided Fiberglass Thermocouple Wire SERIES 321

The addition of color coding and impregnation to the high temperature fiberglass make this wire the next logical step for systems which exceed temperature capabilities of the standard glass insulated series.

Each conductor is covered with a color coded, high temperature fiberglass braid. This braid is then impregnated to enhance abrasion resistance and reduce fraying. The insulated conductors are laid parallel and covered with another braid of high temperature fiberglass and impregnation.

### **Performance Capabilities**

- Continuous temperature rating: 1300°F (705°C)
- Heavy fiberglass braided yarn insulation
- · Twisted design has no jacket
- Available with an optional metallic overbraid for additional abrasion resistance

### **Applications**

- Heat treating
- Aluminum and steel

### **Specifications**

#### Continuous use temperature

• 1300°F (705°C)

### Single use temperature

• 1600°F (870°C)

#### Resin retained to 400°F (204°C)
